

KEYS TO SUCCESS

- We only employ highly motivated and well qualified mechanics, design professional, and consultants that understand the team approach to any construction or renovation project.
- Estimating and scheduling expertise that enables us to track your project with strict detail.
- Our experience with varying size projects gives us a wide range of knowledge and unlimited resources in the building field.
- A complete understanding of “Systems Thinking” as is relative to building systems and fully-integrated construction components.
- Total focus on client objectives and the achievement of those objectives is our primary goal.

SELECTION/PRE-CONSTRUCTION

Upon selection of A E Talley Construction as your contractor, we will review design documents with you. Form a project timeline and budget considerations so you know what to expect. We will secure all proper permits and applications required for your project.

CONSTRUCTION

With A E Talley Construction, you receive individual attention both in the field and in the office from start to finish. Communication is the key to completing a quality on time project to your specifications. Construction begins after an on-site walk through of the property or upon review of design documents to confirm the details of your project. Items covered during a site walk include, but are not limited to:

1. Verifying the constructability of the project
2. Preliminary structural inspection
3. Logistical feasibility analysis
4. Project timeline
5. Assessing the need for temp security, utilities, and material supply areas
6. Construction work time
7. Required Security
8. Protective and safety measure required
